Subject Index

A

AABB, the national clearinghouse program of the 128
A-B-O Agglutinogens 269
Acid-citrate-dextrose, the salvage of heparinized blood with 37
Alarms, blood bank refrigerator, improving coverage and preventing trouble 52
Antibody anti-Js^b of the Sutter blood group system, a second example of the 260
Anti-I antibody, three members of one family with the phenotype i; one with an 216
antibodies and Gm-agglutinins, relation between 211
hrs, the third example of 103
Kell (Kl.), naturally occuring 397
M and anti-D antibodies in a pregnant woman, simultaneous appearance of 57
Rh 6, erythroblastosis due to 281
ATP in stored blood by adenosine and inosine, the maintenance of 349

B

Babies, erythroblastotic, on immunologic tolerance for the A-B-O agglutinogens, observations on the effect of exchange transfusions in 269
Blood, newborn human chimeric twins, a pair of 494
Blood banks, an unexplored function of 75
analysis of work load in 496
Blood donor, the 347
cardiovascular and hematologic responses to phlebotomy in 83
copper sulfate screening of, report of a donor passing the test with less than eight grams of hemoglobulin 398
hospital, sources of error in a 198
"reactors," study of the incidence and characteristics of 76
Blood group A-like substances, influenza virus vaccine and 233
antibodies and antisera to purified immunoglobulins, the reaction between 469
Blood, heparinized, the salvage of 37
platelets 1
transfusion, the principles of 303
Body defense, complement and 250

Book Reviews

An Rh-Hr Syllabus, 2nd Ed. by A. S. Wiener and I. B. Wexler 500
Blood Groups and Transfusion, by A. S. Wiener 220
Case Development Problems in Hematology, Series I: The Red Cell, Problems 1-8, by J. W. Harris and D. L. Horrigan 408
Heart-Lung Bypass. Principles and Techniques of Extracorporeal Circulation, by Pierre M. Galleti and Gerhard A. Brecher 221
Human Blood Coagulation and Its Disorders, 3rd Ed. by Rosemary Biggs and R. G. Macfarlane 291
Immunogenetics, by A. S. Wiener and I. B. Wexler 409
Mechanisms of Anemia, by Irwin M. Weinstein and Ernest Beutler 290
Medicolegal Problems in Blood Transfusions, by Charles H. Randall, Jr. 291
The Haemolytic Anaemias. Part II—The Auto-Immune Haemolytic Anaemias, by J. V. Dacie 220
The Hemorrhagic Disorders, by Mario Stefanini and William Dameshek 221
The Red Cell Production, Metabolism, Destruction: Normal and Abnormal, by John W. Harris 290
Bu^a, an antibody defining a new blood group antigen 8

C

Cardiopulmonary bypass, disappearance of micro-emboli transfused into patients during 192
Cells, red, due to their collection and storage in ACD, damage to 263
red, preservation in citrate-phosphate-dextrose and in acid-citrate-dextrose 364
red, slowly frozen and thawed in the presence of dimethylsulfoxide 483
Circulation, extracorporeal and blood platelets 274
Combs test, false positive, due to bacterial contaminants 283

D

Dextran in communist countries, reported experiences with 376
Dimethylsulfoxide and plasma, preservation of the clot-retracting activity of platelets by freezing in 167
Donations, blood, effects of community and chapter characteristics on 401

E

Erythroblastosis 281
Erythrocytes and their percentage viability after transfusion, the relationship between storage time of 356
preserved, biochemical and electron microscopic study of 161

H

Hemagglutination technic, quantitative, comparison of fetal and adult ABH antigens by the 185
Hemoglobinuria, paroxysmal cold, specificity of the antibody in 278
Hemolysis of large volumes of red blood cells slowly frozen and thawed in the presence of Dimethylsulfoxide, prevention of 483
Hemolytic disease, influenza vaccine and 233
Hemolytic transfusion reactions due to $Anti\text{-}Le^a$, hemorrhagic and 392
Hemorrhage, transplacental 114
Hepatitis, candidate viruses in 443
viral carriers of present status of hepatic function tests in the detection of 202
Hospital blood bank, a statistical approach to ordering and usage policies for a 41

I

Interdonor incompatibility, hemolytic transfusion reaction due to 48

L

Laboratory to bedside: Blood preservation research, a tortuous path for 243

M

Mainwaring, Rosser L., President, AABB 441
Man and lower primates, blood groups in 173
Memoir—Ronald A. Fisher 6
Micro-emboli transfused into patients during cardiopulmonary bypass, disappearance of .. 192

N

N.R.C. compendium on general principles of blood transfusion 303

P

Patient, from donor to, another safety factor.. 125
Pilot tube blood, stored, false positive Coombs tests due to bacterial contaminants in 283
Plasmapheresis, for serum production 214
Platelets, human, in patients with thrombocytopenic complicating disease, function and ultrastructure of transfused, surviving 8
Policies, ordering and usage, for a hospital blood bank 41
Primates, sub-human, viral hepatitis associated with 445
Pyogens, historical viewpoint 245

R

Reaction, hemolytic transfusion 48
Renal failure following transfusion reactions, the prevention and treatment of 34
Rh chromosome *D*—, a third Canadian family with the 100

S

Serum production, seropheresis: plasmapheresis for 214
Seropheresis, for serum production 214
Sickle cell trait blood, massive intravascular sickling after exchange transfusion with 387
Six Tj^{a-} negative siblings, report on a family with 105
Southwest blood banks, the workshop program of 286
Surgery, open-heart, the use of ACD bank blood and fresh heparinized blood in, a comparative coagulation study 368
Sutter blood group system, Js^{b} of the 94

T

Transfusion, an editorial 155

V

Viability, erythrocyte, after storage 364
Viruses, infections hepatitis, of man, studies on the serum 455
